Natural Gifts With a Nordic Spirit

Born from the quiet beauty of Northern Europe, Kalina is a celebration of natural living and thoughtful craftsmanship.

Founded by Katrina Mihalova, who was born in Latvia and is now based in California, the brand was created from a longing to bring back honest, natural products that carry the soul of the maker.

Katrina grew up surrounded by forests and traditions that honored the rhythm of nature. People made what they needed with care, from what the land provided: beeswax, wood, linen. Moving abroad revealed how rare it had become to find pure, non-toxic goods made with the same integrity.

Kalina was born from a wish to keep those values alive. Each piece is crafted in small batches by European artisans who share our respect for natural materials and timeless design.

Our products are made from natural materials. They are not designed to be sustainable; they simply are, shaped by pure materials and honest craftsmanship.
